

Vision 2030 - Digital Transformation & Sovereign AI

Saudi Sovereign AI Platform

Universal AI Agent for Ministries, Universities, Enterprises & E-Commerce

GovTech (Ministries)

EdTech (Universities)

FinTech & Enterprise

E-Commerce & Retail

The Problem: Digital Interaction Gap in Saudi Arabia

Fragmented Information

Citizens & students struggle across thousands of regulations and PDFs.

High Support Cost

Hundreds of millions spent on call centers with long wait times.

Legacy Chatbots Fail

Rule-based bots fail with Saudi dialects and official regulations.

Data Sovereignty

Foreign tools lack PDPL compliance and local hosting sovereignty.

The Solution: Universal Sovereign AI Agent

Instant Auto-Learning

Crawls portals, regulations, bylaws, and PDFs in minutes via 1 script line.

Deep Saudi Context

Native understanding of Arabic, local dialects, and government terminology.

Live Screen Context

Understands user real-time screen and guides step-by-step.

Privacy & AI Control

Instant toggle to exclude sensitive files with full PDPL compliance.

Cross-Sector Impact across the Kingdom

Government & Ministries

Instant licensing explanations, service guidance, 75% call center deflection.

Universities & EdTech

24/7 admission guidance, GPA requirements, curriculum and scholarship advice.

Enterprise & FinTech

Auto finance, mortgage comparison, insurance policies, and lead qualification.

Mega Projects & Tourism

Multilingual guidance for NEOM, Red Sea, Diriyah, and Riyadh Season.

Technical Architecture: Multi-Depth RAG & Sovereign Gateway

1. Headless Crawler

Deep indexing of complex portals and modern SPA/React applications.

2. Semantic Chunking

Decomposes massive regulations and catalogs into precision chunks.

3. Hybrid RAG Retrieval

Zero hallucination matching with sub-second response times.

4. Actionable AI

Direct interactive action buttons and deep navigation links.

Competitive Advantage: Why We Win

Setup Speed: 1 minute integration vs weeks of legacy chatbot decision-tree coding.

Language Precision: Native Saudi dialect & regulatory comprehension vs broken foreign translations.

Live Screen Awareness: Real-time browser context guidance (unique competitive feature).

Data Sovereignty: On-premise and local sovereign cloud deployment (STC, Oracle, Google Cloud SA).

Knowledge Privacy: Granular 1-click exclusion controls for confidential enterprise data.

Market Size & Saudi Vision 2030 Alignment

SAR 130B+ Saudi IT & AI Market

The largest digital economy in the Middle East.

100,000+ Eligible Entities

Government bodies, universities, enterprises, and online merchants.

Qiyas Digital Maturity Alignment

Driving national egovernment rankings and citizen satisfaction.

60% Operational Savings

Massive reduction in support overhead while lifting NPS above 92%.

Business & Revenue Model (B2G / B2B SaaS)

Government & Universities (B2G)

Annual Enterprise Licenses (SLA) with On-Premise sovereign deployment.

Enterprises & Banks (B2B)

Tiered subscriptions (SAR 3,500 - 15,000+/mo) with live database catalogs.

E-Commerce & SMEs (SaaS)

High-volume self-serve subscriptions (SAR 199 - 999/mo).

Integration Partnerships

Strategic alliances with national System Integrators.
